DISCLAIMER

This document is provided in confidence for the test-task to the Aspirants. It should not be shared with any other party or used for any other purpose without the explicit permission of thesocialcomment.

The test will test your html, css, js, angular and node.js knowledge and also your programming skills.

thesocialcomment: Frontend Developer Test.

Test Assigner: Nivesh Singh Chauhan.

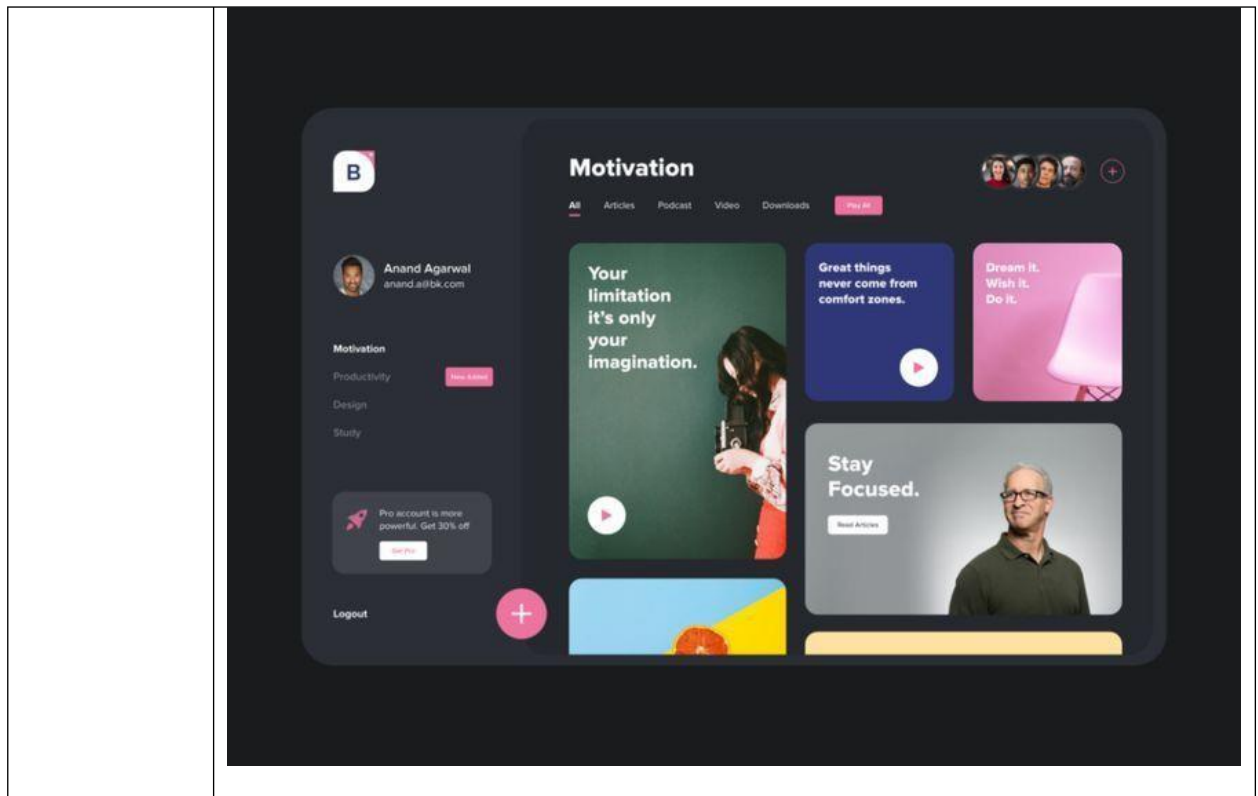

Test Assignee: Aspirants

Submission Instructions – Submission format is to create a GitHub repository and deploy it on Heroku & provide us the link on easiest medium possible.

Task 1

Code the given designs in **Angular or react** (can choose any one).

Task 2	Add SSR to the page created in the TASK 1. Serve it using basic Node Express server.
--------	--

Task 3	Write test for your code (unit test).
--------	---------------------------------------

Judging criteria

- How much the resulted page is similar to the given design
- How good the code is optimized
- Readability of the code
- Knowledge of framework

We are evaluating your code. Do you test properly and if you need any
